

## Road to Yukon-Alaska

May be built by a British Syndicate

Victoria, March 31—Negotiations are under way for possible construction of the Alaska-Yukon highway by an English syndicate in consideration for certain Northern British Columbia land concessions.

This was announced by Premier S. F. Tolmie in the Legislature on Wednesday. We have made arrangements with a London syndicate to have them visit the province next June with a view to their possibly building the road. I do not say the negotiations will be successful, but the surveys we have made of the lands in the north have greatly helped toward a solution.

It was in debating the question of the aerial reconnaissance survey report of the lands through which the highway might pass that the Premier made his important announcement. T. D. Pattullo, opposition leader, condemned the government for withholding the report.

"I would like to know what there is in the report which warrants it being held from the public," he declared. There are people in the north who will like to hear the chances of the highway

passing through their territory. Is the government withholding the report for political purposes? As a matter of fact, while I have never opposed this project, I feel the road cannot be built for many years to come."

"Is the government holding out these possible negotiations as an election antic?" asked A. M. Manson, Liberal for Omineca. "How could the Premier give this report to strangers without submitting it to the people of his province who paid for it."

The survey had cost \$35,000 to date. Premier Tolmie stated. There had been two ground surveys and an aerial reconnaissance. But for that the resources of the country would not have been known. He could think of nothing which would be a greater boon to the province in the way of tourist revenue than a road by which the people of America could pass through B. C. and the Yukon to Alaska. He said to table the report now would not be in the public interests.

On a straight party vote the legislature turned down Mr. Pattullo's resolution that the report be tabled.

## Wedding Bells

FURNESS-HIBBARD

From the Prince Rupert News  
The interesting marriage of a well known and popular local young couple took place quietly at 8.30 Saturday evening at the Manse of First Presbyterian Church, Rev. W. D. Grant officiating, when Miss Pauline Jennette Furness, the eldest daughter of Mr. and Mrs. John Furness of Smithers became the bride of Howard Robert Hibbard, only son of Mr. and Mrs. Geo. T. Hibbard of this city. Only immediate relatives and friends were present at the marriage ceremony and attendants of the couple were Miss Helen Hibbard, sister of the groom and Everett Leek.

Following the ceremony a reception was held at the new home of the young couple on Atlin Ave., Westview, numerous friends calling during the evening to offer their best wishes and congratulations to the bride and groom. Delicious refreshments were served. The usual toasts were offered and responded to fittingly.

Both Mr. and Mrs. Hibbard are widely known and esteemed amid a wide circle of friends. The bride has resided in Prince Rupert for the past three years and has been a valued member of the staff of Mrs. Parker's Ready to Wear. Last year she was a candidate of the Prince Rupert Retail Merchants Association. The groom has lived here since boyhood and is in the service of the Union Oil Co., having been until recently a member of the staff of the Electric Bakery.

## FALL FAIR DIRECTORS ELECTED

The annual meeting of the Terrace District Fall Fair Association was held in the Terrace Hotel Saturday night. The auditors report showed a credit balance of \$3.37 after all expenses for the year had been met. The new directors were elected as follows:—J. K. Gordon, J. Lever, G. Hamlin, D. Kerr, C. H. Thomas, Rev. T. H. Allen and Mrs. C. H. Thomas. The directors expressed approval of holding a fair in 1932 as usual, but the final decision is to be taken at a meeting to be held on April 30th. It is hoped that C. R. Gilbert will have returned from his world wide trip by that time, and that the meeting can be arranged as a well come to him.

## CHANGES IN DAIRY INDUSTRY

During recent years the dairy industry has been developing and in the last ten years five new products have made their appearance on the market, such as evaporated skim milk, condensed buttermilk, cream powder, butter mill powder and malted milk powder. A decrease of 26.5 per cent in the volume of cheese manufactured, 40.1 per cent in the production of condensed milk and 38.1 per cent in the production of condensed coffee. In contrast with this and indicating the changing trend of production, there has been an increase of 1,016.8 per cent in the production of casein, of 590 per cent in the production of condensed milk, of 222.1 per cent in the production of ice cream, of 148.9 per cent in the manufacture of skim milk powder and of 108.2 per cent in the amount of cream sold as butter fat.

Owing to the Legislature being still in session Dr. Winch will not be able to get home before next week.

The Felix Club met at Mrs. Sharp's on Tuesday night and Mrs. Chappell was winner of the prize. The meeting next week will be at Mrs. Chappell's.

## Make Attractive Camps

Plant Trees, Shrubs, Plants—Have Amusements

The outside of the Inn, the Roadhouse, the Tourist Camp, and in fact, the resort of any kind, should be as attractive as the interior. Good taste and a little intelligent work would do a lot to improve things. Our tourist business is getting bigger year by year and undoubtedly the tourist wants something different. Flowers, shrubs and trees and a well kept garden are most restful and attractive. How can this be done? By planting trees, flowering shrubs and plants, but the planting must be done after some definite plan. First of all one wants a planting that is not easily damaged, because where a large number of people congregate they are apt to none too careful as to where they step. Secondly we want a planting that will not cost a fortune to keep in order. And thirdly we want a planting that will look its best during the holiday season, that is to say between June and September and will at the same time be at least presentable at all seasons of the year.

At the outset let it be said that the cheapest way to lay out grounds is to employ a landscape architect or gardener, to make the plan, and then have it followed to the letter. There are many people, however, who for one reason or another prefer to do all their planning and planting themselves, and for these a few hints are offered.

If, on your location you have some good native trees, don't on any account cut them down, because you cannot grow a large tree in a life time. Rather arrange your plan so as to work the existing trees into the general scheme. Now make some definite plan and have at least one main feature. This may be whatever takes your fancy—perhaps a water garden with pools of water lilies for these will be in full bloom during the summer. The location may be rock. If so, the rock garden will have its appeal, but it will take careful planting to have a large show of bloom and fern during August.

A very attractive feature may be made of pergolas with climbing roses. By choosing your roses properly you can have some blooming most of the season. A garden of heathers is a feature that may be had in bloom for most of the year.

It is astonishing how some particular plant will make the name of a place known from one end of the country to the other. An instance of this is the Lake Louise poppies. Everyone who has been to Lake Louise knows about the poppies that grow there in their thousands. Many people think that they are native to the area, but such is not the case. They are simply the ordinary Iceland poppy which has become well established and has spread over a considerable area, but still people talk of them as the Lake Louise poppies.

Then, why for instance, should not a tavern or a tourist camp have a bowling green, a tennis court or an archery target, or a putting green? Any of these features can be had for a comparatively small expenditure of money and any or all of them would prove attractive to the tourist. Different places will lend themselves to one or other of these amusement greens, and it is for the owners of resorts to choose the kind that best suits his situation. Archery has just now taken on a new lease of life and it is an inexpensive form of amusement inasmuch as the ground need not be dead level. Almost the whole expense would consist of targets and a supply of bows and arrows. Quoits are also a favorite pastime and the equipment for this game is simple and inexpensive.

The greatest thing is to make all these resorts attractive both to the eye and to the senses. People with an hour or two on their hands, waiting for lunch, or tea, or what-not, would appreciate something to do, and these amusement greens would fill that need and make the place popular.

## BALL TEAM HAS ORGANIZED

John Rukin is Manager and Secretary and S. H. Senkpiel is Captain of New Hazelton Team

There was a good attendance at the baseball meeting in the New Hazelton hall when the local ball team got organized for the season. The boys are quite enthusiastic this year and they have hopes of making a good showing by the end of the season. John Rukin was elected manager and secretary for the team and S. H. Senkpiel was elected captain. The boys have already done some practicing and in future will work under direction. In order to provide some necessary funds to carry on with the boys are putting on a dance on Friday, April 15 with an admission fee of 50c. There should be a very large turnout to this affair.

## CARE OF HATCHING CHICKS

This is the time of the year when the farmer with a good flock of poultry finds hatching eggs in demand. There are some points in the handling of hatching eggs which may appropriately be referred to at this time. Too much care cannot be exercised in culling eggs which are intended for hatching use. A metal bucket should not be used because the slightest contact with a hard surface may cause a check or crack in the shell. Straw or burlap gives protection. There should be plenty of nests available for the hens, from 12 to 15 nests for a hundred birds. When culled hatching eggs should be kept in a cool place, they should not be kept too warm, germ growth starts at a temperature of 69 degrees and the room in which the eggs are kept should not be more than 50 to 60 degrees. Eggs should be delivered to the hatchery as soon as possible after gathering.

Mrs. Dorothy Brown, formerly of the Kispiox school, and who has been a patient in the Hazelton hospital for several weeks, has improved to such an extent that she is able to leave in the morning for Vancouver where she will stay with relatives during convalescence.

## WILL CLEAN UP HAGWILGET

Instructions have been issued to the Indians at Hagwilget to get busy and clean up their premises and the whole reserve. The idea is to make Hagwilget look as respectable as possible before strangers start motoring into the district. The move is a most commendable one as Hagwilget is one of the most beautiful spots in all British Columbia and instead of a dirty and dilapidated Indian reserve marred by the beauty of the place, the Indians can, with a little work, add materially to the interest of the place. Everything is in their favor.

## IT WORKS BOTH WAYS

The cost of transportation is an important factor in determining the profitable source through which special crops can be distributed. Taking the early carrots as an instance. Eastern Canada imports its supply very largely from Texas and the British West Indies. The situation is reversed with respect to the Pacific coast area where British Columbia growers export considerable quantities of this vegetable to the Pacific sections of the United States.

## BOYS AND GIRLS DEBATE

A debate was staged in the Lazelle rooms on Friday night between the C. G. I. T. and the Boy Scouts. Misses Bertha Moore, Doris Houlden and Luella Llewellyn took the affirmative the subject being, "Resolved: that living in a log cabin in the north brings more happiness than living in a mansion in the south." Fred Nash, Lewis McKenney and J. M. Sparkes, for the boy scouts, advanced the arguments for the negative. When the smoke of battle cleared away the judges announced that the boys had carried the day, the points awarded being 38 for the winners and 32 for the girls. Peace was effected in the dance that followed and the battle was refought over the refreshments that were served at 11.30.

Mr. Multhead of Smithers is relieving at the bank in Hazelton.

## CHALLENGE TO PATTULLO

In the Legislature last week Hon. Mr. Bruhn, minister of public works, challenged Mr. Pattullo, leader of the opposition, to name a single instance where money had been squandered by the present government on highways. "You talk about money being squandered," said Mr. Bruhn, "but let us hear how and where it was squandered."

## SOME RASPBERRY NOTES

Special attention has been given to the problem of raspberry cultivation in certain sections of the province. The particular purpose of the survey was to determine the reasons for the decreased yields from raspberry patches. These are found to have been due to the following causes:—

- 1 Poor management where the farm owner devotes only a part of his time to fruit production or makes it a secondary consideration.
- 2 The presence of disease, of which cane blight and mosaic are most in importance.
- 3 The presence of insects and animals of which crown borers and moles are the most important.
- 4 A depletion or lack of soil fertility.
- 5 Winter injury caused chiefly by the removal of virgin timber and underbrush.
- 6 Poor cultural practices.

## Cedarvale Notes

Mrs. Annie Brown, a well known native woman, passed away on Easter Monday at 11 p.m. The funeral was conducted on Thursday by Capt. T. R. Tomlinson.

General Road Foreman J. A. McDonald and Will Robinson were in the village recently to arrange for the resumption of work in the camp.

Miss Curry of Kitwanga spent Easter with Miss Thompson.

The B. and B. gang were here the past week building coal sheds for the section crew.

May I suggest to some of the politicians that they send two sets of chess and two of checkers to each relief camp. We also suggest to anyone who has no inspiration as to what to do to make the life more interesting for the men in camps, hereby gaining the good will of the men in camp and also have the satisfaction of having done something.

The Prince Rupert papers in reporting the public works appropriations for the north had no allotment for Skeena district. Omineca gets \$40,000, Atlin gets \$27,000, and Prince Rupert gets \$20,000.

# Attention! Mr. Car Buyer

If you are considering buying a used car this season we cordially invite you to inspect our stock of CERTIFIED reconditioned cars. Every car offered for sale by us has been thoroughly checked over and reconditioned, and will carry our guarantee as being free from defective parts, and in perfect running order.

Each car offered will be supplied with a 1932 license at no cost to the purchaser, and can be purchased on the very liberal General Motors Acceptance Cpn. time sales contract.

Your old car traded at car appraised value.

**Smithers Garage & Electric**  
SMITHERS, B. C.

The big bridge over the beautiful Hagwilget Canyon, Bulkley River, New Hazelton, which will attract many tourists during the summer.

### NEGOTIATIONS ARE UNDER WAY

Premier Tolmie told the Legislature the other day that active negotiations were really being proceeded with a British syndicate for the construction of the British Columbia portion of the Great North Road from Mexico to the Alaska territory. The B. C. government will grant the syndicate certain

concessions providing the work is proceeded with. This will be the greatest number of years and when completed undertaking in the west for a good road will probably be the most travelled road in the west. It will certainly increase the tourist traffic many times, and no doubt will aid very materially in the development of Northern British Columbia.

When the B. C. police catch Bagley and Lindbergh gets his baby back the world will be at peace—maybe.

There is a lot of talk now days about doing away with party politics in the provincial legislature. There is a lot to say in favor of a non-party administration, and by a much smaller number of men. But the first thing to be done before starting on a non-party government would be to get ride of some, if not quite all, of the present members. That would be a difficult matter. The chief idea behind the non-party movement seems to be to get a greater share of the revenues of the province for Vancouver—perhaps that city might allow a little more to Victoria to keep the boys there in good humor. Outside of Vancouver it is doubtful if the scheme would get any support. British Columbia would never get anything like a square deal if its affairs were run by Vancouver men and that is all that is behind the new dress for the old movement.

Peace River people are actually in favor of making a new province for the north. The people up there know they will never get a square deal from the south. There are not enough Vancouverites ever leave their own boundaries, unless it is to go to the States, to know that here is any such thing as British Columbia outside of Vancouver. While Peace River wants another province, the tendency in all other parts of the Dominion is to have fewer

provinces. It is a — of a mixup to say the least.

It is time to start cleaning up the accumulations of winter—rake and scrape the muck out of the back yard and tidy up the front yard, and to get the garden in shape. So far the winter has not decided to quite altogether and while a lot of dirt can be disposed of the real work must wait for the weather man.

The people who are going to get by next winter are those who try to do something for themselves—that does not mean coveting someone else's property. There is no reason for anyone in this part of the country not having a full supply of vegetables, small fruit fish, etc., for next winter, and there is no reason why anyone should have their stuff frozen. There is lots of time to fix a root house properly, there is lots of wood to keep everything warm. The trouble is that to provide these things for oneself means a certain amount of work—and it is so much easier to sit around and beg from a good and paternal government. Or the other hand it is a pleasure to give a helping hand to anyone who has tried to help themselves.

Old Man Winter, like Old Man Depression, is putting up a great struggle and refuses to let loose. Another snow fall on Monday night mucked up the roads again just after they were beginning to get in some kind of shape.

Members of the legislature unanimously voted for a resolution on Thursday sponsored by Capt. James Fitzsimmons, Conservative for Kalso-Skecan, which urged that Canadian representatives at the coming Imperial conference be instructed to bring up the question of the stabilization of silver. Capt. Fitzsimmons urged that Canada urge more use of silver coins so as to help the silver mines.

## Principals in Heroic Sea Rescue

On the afternoon of Saturday, March 12, there was enacted off Halifax a true drama of the sea, replete with all the best traditions of "those who go down to the sea in ships." The salvage ship Reindeer, herself on the way to aid a vessel in distress, became a wreck and sent out an S.O.S., which was picked up by the Canadian Pacific liner Montcalm, bound from Liverpool to Halifax. Captain A. Rothwell, her commander, at once altered course and raced to the sinking Reindeer. When within two miles, volunteers were called for and a lifeboat, under command of Second Officer H. S. Knight, battled with wind and high seas for nearly four hours to reach the stricken ship. Captain Rothwell handled the Montcalm so as to make a lee for the rescuers and kept oil going in their track. Captain Featherstone and his crew of 27, to say nothing of a police dog, were safely taken off and the return trip to the Montcalm made in about 15 minutes, thanks to the wind. The shipwreck victims were given a rousing welcome and their rescuers cheered to the echo by the Montcalm's passengers, who witnessed the entire event. Later, a purse was taken up for the volunteers and a silver cigarette case presented to Second Officer Knight. A telegram was also sent to E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, commending the rescue work. The upper picture shows the crew of the Reindeer, with Captain Rothwell and Second Officer Knight in uniform. Beside Captain Rothwell is Captain Featherstone. Lower picture shows the brave men who manned the Montcalm's lifeboat. In the foreground are Second Officer Knight and Captain J. Lawry and W. Hughes; Boatswain W. Doyle and Rothwell. Left to right from top are: Able-Bodied J. Smythe, lamp-trimmer,

Seamen J. Carr; H. Addicott; L. Page; H. Pearce; J. Lawry and W. Hughes; Boatswain W. Doyle and Rothwell. Left to right from top are: Able-Bodied J. Smythe, lamp-trimmer,

## Terrace Notes

Owing to the renewed outbreak of measles Dr. S. G. Mills has ordered that the Kitsumgallum schools remain closed for another week. Notices have been posted in town announcing the re-opening on April 11.

On Saturday and Monday the Kitsumgallum Farmers Institute was busy unloading a car of feed, fertilizer and seed.

Matt Allard and E. Dupont arrived in from their trap line at Kallum Lake on Friday. They had some fur with them and shipped it to Prince Rupert. After staying in town for a few days they returned to the north for the rest of the season.

A. J. Galland, Canadian Chisels of floor at Prince Rupert, was in town during the week on business.

A. D. Goodenough of the Hanson Lumber and Timber Co. made a trip to various points along the railway dur-

ing the past week. He says the pole business is still very quiet with not much prospects of speeding up for the time being.

Mr. and Mrs. H. McPherson of the Lakelse hatchery were in town last Thursday.

R. J. Smith of Vancouver stayed in town over the week end.

Mr. and Mrs. A. J. Downing and child were in town over the week end.

A large number of people were at the station on Wednesday night to bid farewell to Miss Margaret Glass and Miss Helen Greig, who left that night to enter the nurses training school in connection with the Hazelton hospital. The girls are among the best known of the younger set and are very popular in all social activities. They also have better than average school success.

A party of local fishermen made a trip to Copper River on Sunday and returned with good catches. A considerable amount of fish is being taken from the local creeks and rivers now.

The order has been issued for the work to start in the relief camps for the single men who have been in the camps all winter.

D. C. Mawhinney, returned from his winter at Stuart Lake the other day and he expects to return up country in a few days where he says he has a contract for his pack train to work into McConnell creek placer fields.

Much of the cheerfulness of the Philbert Hotel was missing for a few days when mine host Louis Martin was indisposed. He is now up again performing his accustomed duties, and his sunny smile and hearty laugh are on tap again.

Pile driving for Braun Island bridge started the middle of last week and the foreman expects good progress to be made from now on.

J. B. Johnstone of Lakelse Lodge was in town on Thursday and he reports good progress with building activities with building operations. He

has had a lot of use out of the sleigh road the Department of Public Works put in for him. He says the lake will be clear of ice in a few days.

Fred Nash left on Tuesday for the Hot Springs to run levels for the pipeline.

J. K. Gordon says he has about finished in his orchards and expects to wind up early in the week. He has with him this year Mr. Sharp of the Yakama Valley who has had long experience with pruning work there. Mr. Gordon is pruning heavily this season and has adopted the same practice they work under in the south where the growers found it necessary to cut the wood heavily in order to get size and color demanded by the high grade markets.

Provincial Free Miners Licenses are now being issued. By taking advantage of this license any who have lived in the province for six months may prospect for placer ground free of charge. The license does not cover the registration of licenses under the placer act.

A great deal of interest is being taken locally in the outcome of the reds tribulation bill to be introduced in the legislature in the near future. Speculation is rife as to what effect this will have on the local situation.

Spring work has started along the C. N. R. Snow fences have disappeared and cow guards have appeared and a close watch is being kept for rock or other kinds of slides.

J. B. Agar is able to be around again although he complains of a little stiffness at times.

The municipal office is now installed and operating in the Blue Room of the Canadian Legion hall.

John Price, an old time prospector in this district, who died in the Prince Rupert general hospital last week, was buried on Friday morning last. Rev W. D. Grant Hollingworth conducted the services and interment took place at Fairview cemetery.

## The World Owes Much to Advertisers

ALL OF US would be poorer if there were no advertisements in our newspapers—poorer in pocket, mind, comfort and culture.

Advertisements have been called "The Poor Man's University," for they are wonderful teachers—wonderful mirrors of the world's scientific and cultural development.

It is advertisements which keep us informed about what is being accomplished by the world's best engineers, chemists, research workers and technicians in every field of human endeavor—the realms of radio, motor-car and tire manufacturing, food preparation, remedial preparations, domestic and personal hygiene, building materials and construction and agricultural economy, home easements and beautification.

If there were no advertisements in our newspapers we'd all slip back—to the levels of life of 50 and 100 years ago. We'd read less, move about less, lower our living standards, be content with poorer machines, eat coarser food and wear coarser clothes, live in unattractive homes, do a vast amount of distasteful labor, wear ill-fitting shoes, see ugliness everywhere, have more illness, meet with more accidents, have more toothaches; and our stores would be very dull, dull places indeed.

To blot out our advertisements would be like blotting out the sun—the source of light and energy.

Be grateful to advertisers, and show your gratitude by buying what they bring so faithfully to your attention—in this and other newspapers.

And always remember that advertisers are the world's civilizers and your true friends.

This advertisement is sponsored by the Canadian Weekly Newspaper Association

## These corn flakes are guaranteed

BEHIND every package of Kellogg's Corn Flakes is the personal guarantee of W. K. Kellogg: "If Kellogg's aren't the finest and freshest corn flakes you ever tasted, return the empty package and we will gladly refund your money."

For 25 years Kellogg's have stood as the standard of value. Made with a delicious flavor and crispness no others can duplicate. Packed by a method that assures *oven-freshness*. A completely sealed inside WAXTITE bag—which is a patented Kellogg feature.

Kellogg's are economical, convenient, delightful. Remember that where substitutes are offered, it is seldom in the spirit of service. Demand genuine Kellogg's in the red-and-green package. Made by Kellogg in London, Ontario.

Several men were put to work Monday morning filling up some bad holes in the road with gravel. These holes are on the road from Hazelton to the South Hazelton station. Trucks and cars were getting stuck every day. It is also understood that work at the Porphyry Creek relief camp also started this week.

The Base Ball Boys of New Hazelton are giving a dance in the New Hazelton Hall on Friday evening, April 15. The admission is only 50c and the boys guarantee you a good time. The ball team needs some new equipment and the boys hope enough people will turn out to the dance to supply their needs.

The annual meeting of the New Hazelton Citizens Association is called for

Thursday night in the hall at 8 o'clock. There will be an election of officers and general business. All interested are requested to be present and join the Association.

The Prince Rupert papers in reporting the public works appropriations for the north had no allotment for Skeena district. Omineca gets \$40,000, Atlin gets \$27,000, and Prince Rupert gets \$20,000.

Mrs. Dorothy Brown, formerly of the Kispiox school, and who has been a patient in the Hazelton hospital for several weeks, has improved to such an extent that she is able to leave in the morning for Vancouver where she will stay with relatives during convalescence.

## Doings Around Home

Of interest to you and your friends

Mrs. Peter Smith and daughters returned from Pitman last Saturday after spending Easter with Mr. Smith.

Dr. H. C. Wrinch spent Easter at Kamloops. He is expected home the middle of the present week.

Mrs. Mussallem of Prince Rupert has been visiting her daughters at the hospital here and in Smithers.

Mrs. Robt. Tomlinson returned from Victoria a week ago and was accompanied by Mrs. Tomlinson, sr., who is going to spend some time here.

The April Fool Carnival given under the auspices of the W. A. to the H. H. in Hodder's hall last Friday night attracted a large number of people and the W. A. took in quite a lot of money. The affair was something novel and seemed to be appreciated.

There was a very large attendance of teachers at the convention in Prince George during the Easter holidays and the citizens of that place gave the teachers a good time.

British Columbia cattle are the most healthy in the world, says Premier S. F. Tolmie.

Mat Myros is displaying a handsome challenge trophy which he was instrumental in having presented to the Hazelton Golf Club. He is working out a schedule in connection with the play for the trophy.

The golf season has opened on the Hazelton Golf course. Last Sunday morning Robt. Hunter and Wm. Larmer went out to hit the first ball and they played six holes. Hunter took three and Larmer two with one a draw. They did not keep a correct score, or at least they are not making it public. They found the course quite damp in places and some snow in shaded spots but they report having had a good time just the same.

Ben Jones of the Royal Bank staff left Monday night for Vancouver for a three week's vacation at his home.

There will be a change in the calendar, but it will not be for at least three years yet, so you can proceed with plans for the summer vacation.

Bud Bell and Charlie Benson are on their way to Manson Creek to prospect for placer gold. They do not expect to return before the end of the year.

Alfred Hall was camped last summer for several weeks near the bridge

on the P. G. E. railway which collapsed recently and injured a number of people. Alfred was prospecting in the creeks.

Austin Goodenough and Antonia Sartori motored down from Smithers the first of the week. They report that the trip is no joy ride yet. There is a good deal of snow in some places.

The proceeds from the April Fool Carnival held in Hazelton last Friday amounted to \$60.75.

Dr. Galbraith leaves in the morning for Vancouver after having spent several weeks on the hospital staff at Hazelton.

The W. A. to the H. H. met at the home of Mrs. Sharp on Tuesday afternoon and after general business was transacted the ladies decided to hold a bridge on June 3rd, the King's birthday.
